## For Clean and Dry Upholstery that Looks Its Best Every Day

The beauty of the Aridex Upholstery Cleaning System is that cleaning can be routine and not a special project because with most fabrics, your furniture will be back in service within 30 minutes.

## Aridex The Dry Upholstery Cleaning System

A simple and fast method for deep cleaning your upholstered furniture anytime without the inconvenience of getting it wet.

Great for cleaning all types of fabrics including velvet, jacquard, weaves, tapestry, brocades and leather.

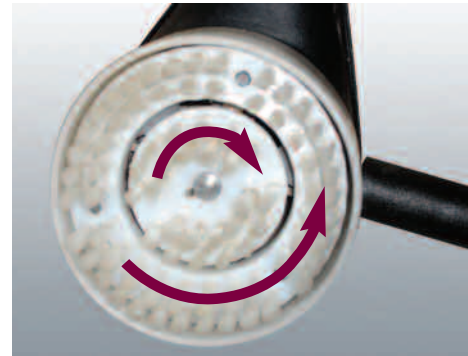

- No over wetting
- Never any shrinkage
- No sticky residue
- Can see results immediately
- Safe for all types of fabrics
- Easy-to-use
- Reduces labor costs

## How Aridex® The Dry Upholstery Cleaning System Works

Aridex uses a unique counter revolving power head and a specially formulated detergent to dissolve, emulsify and encapsulate the dirt. The high tech encapsulating detergent is mixed with air to create unique low moisture cleaning bubbles that surround, suspend and encapsulate the dirt. The bubbles use 90% to 93% less moisture than most other upholstery methods. As a result, fabrics are not soaked through. The detergent is safe, nontoxic, biodegradable and does not contribute to resoiling. Aridex is truly a low cost, low moisture, safe and easy upholstery cleaning system.

The counter revolving brushes gently agitate the upholstery, removing the dirt without distorting delicate fabrics. The machine includes a reversing switch which extends the life of the bristles. The accessory handle makes operation easy.

The cleaning bubbles surround and suspend the dirt and encapsulates it, holding it for removal by vacuuming. Aridex can be used to clean virtually all fabrics, including haitian cotton, leather and velvet. The 3 position switch allows the operator to activate the brushes and cleaning bubbles quickly and easily.

The built in wet/dry vacuum removes the dirt-laden, low moisture cleaning bubbles leaving fabrics slightly damp. Usually upholstery and other fabrics will be dry in 30 minutes or less. There is no sticky residue left behind to promote resoiling.

The Aridex machine is easy to carry, small and compact. This makes it ideal for many applications including auto detailing, office panels, aircraft & boat interiors, theater seating and carpet covered walls.
